

"CONSOIL" Gent 2003

Peter, can I have the first slide?

Yes Theo, can you tune in?

[paint it black]...[10-5]

[..I..]. I see a brown field and I want it tur-ning black

Where po-ly- a-ro-ma-tic-hy-dro-car-bons lack

I want the earthworms there, and shrubs , . a scarlet rose

I like to turn on nature, so pollution goes

I hate persistent pesticides like D D T

I hate them.-accumulated in the honey bee

I want them humified and rendered without harm

I want a black soil...with its green, intrinsic charm

No applause after every sheet please.

Or after every new melody

[ruby Tuesday]

They.. would never say ...where they came from

Yesterdays pol-lutors.. , they are gone

As the snow in bright

And in the darkest night

And who knows?

What stays, what goes!

He you! risk as-ses-sors

Can we hang a name on you?

Do you know sustained remediation?

Do you really go for that? [2x]

[lets spend the night]

* blablablaba.... Bla, bla, blaba.....
blablablaba...Bla, bla blaba.....

* Legal advisors with your funny acts; o no!
Blablablaba bla bla blaba

* Do you quarrel bout fic-tions and facts; o no!
Blablablaba bla bla blaba

** Please sci-en-tist are you coming down
....coming down..

** Out of the height, get- into the town ;
..... yeah foulkes, into the town, o yes!..

Let's spend a view together
Now we need that more than ever
Let's spend a view together, now

Uno, dos, treis, quatro
Un, deux, trois, quatre
Een, twee, drie, vier

* Sellers and buyers, won't you hide; o no!
Blablablaba bla bla blaba

* The soil is deep, deeper than wide; o yes
Blablablaba bla bla blaba

** He business man, are you coming out
...coming out...

** Out of your safe, speak clearly and loud;
.. yeah foulkes, clearly and loud, o yes!...

Let's spend a view together
Now we need that more than ever
Let's spend a view together, now!!!!!!

[have you seen]

Have you seen those microbes, baby, standing by for nature

Have you seen them all together, standing by for nature

I'm glad you opened your eyes.....

Re-cy-cling can happen time is the prize.....

Have you seen the nature baby, acting in the shadow

Have you seen them om-ni-pre-sent, acting in the shadow

We just can passing the time...

Checking conditions... paying a dime

[.] Tell you a story 'bout [] how I adore them

The [] act in the shadow, see [] through the shadow

Life []in the shadow,

Love []in the shadow

Fate [] in the shadow

Life []in the top-soil

Love []in the topsoil

Fate [] in the topsoil

Life[] inne ...! Consoil

Love [] inne.. Consoil

Faith th th inne Consoil

And I love a natural life !

[little creatures]

Seven yellow duck-lings , were floating on a stream
They did not kwek, they did not kwaak, they did not even dream

It was the end of august ...a hot day very bright

They called it botulism,... and that's why they died

Little creatures: they do vital things, vital things

Little creatures: they do vital things

Three thousand years before us,... they filled a bottle stone
With grapes, and grapes and grapes again ...and left it all alone..

Spontaneous generation ...they credit Bacchus for

But it was fermentation ...we strongly still adore..

Little creatures: they do vital things, vital things

Little creatures: they do vital things

She really was a lady,.. erotic, one with balls

He killed her with a knife,.. she treated him so false

He buried her at night.... Under a chestnut tree

They only found her bones,.. her teeth and a... key

Little creatures: they do vital things, vital things

Little creatures: they do vital things

He owned a dry-clean store.., and when it starts to rain

He voided wasted water ... into the sewer drain

Of course this was illegal.. but brilliant-ly as well

Since halo-respiration, evolved in a living cell

Little creatures: they do vital things, vital things

Little creatures: they do vital things

They say attenuation, is very natural

Where sorption and dilution, are involved as well

But, purification power, is the best applicable

Is due to little creatures, they are infailable

Little creatures: they do vital things, vital things

Little creatures: they do vital things

Little creatures: they do vital things, vital things

Little creatures: they do vital things

Thank you for your attention and contibution....

Are there any questions?

Is it a question for me or for Dr. Doelman?
